

Leadership CURRICULUM

The Power of Collaboration

Meeting Complexity with Mastery

There are groups, and there are Great Groups. Great Groups tap the best in every member, leaving behind their creation for the organization's gain. The Power of Collaboration is designed for those who are interested in experiencing collaboration at its finest – with each and every member clear and empowered. We designed this course for leaders who are ready to go to the next level in their overall effectiveness in working with others. We introduce new capacities, ways of listening and working together. We encourage the next level of organizational contribution – true collaboration. Collaboration invites people to imagine bigger, act bolder, and change the world in some important way.

.....

Why collaborate?

1. Problems are complex
2. Resources are often not connected hierarchically
3. Organizations are often asked to do "more with less"
4. There is a lack of trust in traditional structures
5. Collaboration promotes ownership for changes and invites diversity of input
6. To promote learning and increased capacity for all involved

The course

We present the Power of Collaboration as a seven session series of conversations. Session one, is a two and a half-day off-site. Sessions two through seven are full day programs. These are offered in both gender specific and mixed gender groups.

Session topics include:

- Leading authentically
- Developing trust and respect
- Increasing confidence in ambiguity
- Developing a powerful relationship to failure
- Engaging the power of appreciation

.....

"Genius occurs when a person's body or mind is stretched to its limits in a voluntary effort to accomplish something difficult and worthwhile. For each person there are thousands of opportunities and challenges to expand and access genius".
